Summary

Data Analytics Engineer experienced in building end-to-end data systems, automated ETL pipelines, and scalable analytics solutions, with experience managing technical projects from requirements through delivery. Skilled in Python, SQL, Power BI, AWS, Oracle DB, and Zoho, with expertise in data integration, automation, data quality, KPI reporting, and business intelligence. Experienced in website project management, stakeholder coordination, and translating business requirements into technical solutions.

Experience

- **SOCL [🌐]** *Dubai, UAE*

  Growth Analyst January 2025 - February 2026

  - Designed and implemented an end-to-end data ecosystem integrating Zoho CRM, Zoho Books, Meta Ads, and Monday.com through automated SQL-based ETL pipelines, improving reporting efficiency by 60%.
  - Developed automated data validation and reconciliation frameworks across four integrated platforms, improving data accuracy by 60% and resolving 100% of identified discrepancies within 24 hours.
  - Built transformation and reporting workflows using SQL, Power Query, Python and Power BI, reducing manual reporting and reconciliation effort by approximately 15 hours per week.
  - Designed centralized analytics datasets and dashboards supporting 20+ business KPIs including CAC, LTV, ARPU, retention, win rate and pipeline coverage.
  - Investigated pipeline and data-quality issues through root-cause analysis, implementing corrective solutions to improve reliability and consistency of downstream reporting.

  Project Manager & Data Consultant May 2026 - October 2026

  - Managed SOCL's website development project using an Agile methodology, coordinating requirements, content, design, development, and iterative revisions.
  - Translated business requirements into development tasks, tracked deliverables, and coordinated project activities.
  - Reviewed website deliverables, coordinated revisions, resolved issues, and supported project completion.
  - Continued supporting SOCL by maintaining and extending data, reporting, and automation solutions.
  - Enhanced analytics and reporting workflows to support evolving business requirements and operational decisions.

Skills

- **Languages & Tools:** Python, SQL, PySpark, Power BI, AWS, Oracle Database, Databricks, Git, Excel, Zoho Analytics, Docker
- **Data Engineering:** ETL Development, Data Integration, Data Modelling, Data Quality Management, Data Pipelines, Workflow Automation, Reporting Automation, Query Optimization
- **Statistics & ML:** A/B Testing, Hypothesis Testing, t-test, Chi-squared, Anova, TensorFlow, Tokenization, LLM, Text Analytics
- **Personal Skills:** Project Management, Critical Thinking, Communication, Data Handling, Problem Solving, Stakeholder Presentation, Fast Learning, Team Collaboration

Certifications

- **AWS Certified Data Engineer Associate** *October 2026*
- **Databricks Fundamentals** *August 2026*
- **Agile Foundation** *May 2026*
- **Oracle Data Platform 2025 Certified Foundations Associate** *February 2026*

Education

- **B.Tech Information Technology** *2021 - 2025*

  APJ Abdul Kalam Technological University Kerala, India

Projects

- **YouTube Content Strategy Analysis [Personal Project] :**
  Tools: API, Python, NLP, PowerBI & Power Query
- **AI-Powered English Learning Platform with Voice Interaction for Enhanced User Engagement [College Project] :**
  Tools: NLP, Dart, Python, Django, Google GenAI, MySQL, HTML, CSS, JS, Bootstrap, Flutter
